

We can make it for you – exceptional bespoke machining services.

Finding someone to make non standard items can be difficult. Trusting them to make a good job of your specification is another concern. Clive Durose has an unrivalled reputation for excellence in its special manufacturing department. Staff who are traditionally trained and qualified are also right up-to-date in their ability to use the latest high tech equipment. The result can be seen in the finished products. Great quality delivered on time.

Our bespoke services include: Turning – spindles and posts

CNC Routing – panel work and solid wood

Moulding – linear moulding

Hand sanded for a perfect finish.

Sharp detail is achieved.

Complex profiles machined in solid wood or sheet materials.

A few examples.

Grand designs for grand homes.

We can't ignore modern technology, nor would we be right to do so. The combination of this modern approach and traditional skills make Clive Durose the most flexible business of its kind, we design spindles and posts for all applications and produce parts from architects and designer specifications. So if you want something different we can help.

Another solution for your design and manufacturing needs.

Sophisticated tool room and measuring equipment for precision and speed.
