

Demountable newel

Moving furnishings up narrow stairs is so easy with the Demountable newel.

Tools and cover buttons included.

Easy to assemble and take apart.

In many new homes space is at a premium. Stairs are often just that little too narrow to allow all types of furniture to go exactly where the home buyer may want it.

For builders who want to be sure their customers can make the most of their new homes, Clive Durose has a patent pending solution which is simple enough for anyone to use. Simply undo two allen screws and you can remove the newel post from the stair. Used in conjunction with removable spindle sections you are free to carry wide loads up and down stairs.

Another technical solution from Clive Durose.

Alternative safety barrier may be required when working at height.
